You are part of the G.R.C team at ACOVNA.SRL, your goal is to lead a 1-wekk access review campaign across all departments. Below are 20 employees, their titles and the tools they currently have access to, along with their roles/permissions. Some of these access levels may be appropriate. While others are over-permissioned or misaligned with employees' jobs.

Task:

- **Identify any users with excessive or unnecessary access**
- **Flag tool access doesn't match the employee's job function**
- **Collect manager responses and submit revocation requests to IT**
- **Document the revocation evidence**
